

## Canopy Setup Instructions

1. Layout canopy on ground. Use tarp to lay down first to keep canopy clean.
2. Extend ropes out from each side pole hole (extend corner ropes in "V" position).
3. Assemble 2-piece side pole and lay straight out from pole hole along rope.
4. Drive stake approximately 5 feet from edge of tent next to each pole. Attach rope end loosely to stakes.
5. Insert (2 pc) side poles into grommets at a 45-degree angle with bottoms slanted inward. (Bottom of side pole should be slanted in toward center of tent.)
6. Assemble 3- or 4-piece center pole and move in under canopy. Keep at a slight angle.
7. Tighten stake ropes when raising side poles to upright positions.
8. Raise center pole to upright position.
9. After set-up check all ropes to make sure canopy is secure!
